Valeria CASO

PhD, associate professor
Department of Neurology
University of Perugia
Italie

Kantonsspital Aarau

Dear colleagues

It is a great pleasure to announce the upcoming Swiss Neurology Webinar (SNW).

The lecture will be held by Valeria Caso, PhD, associate professor at the Department of Neurology, University of Perugia, and president-elect of the European Stroke Organisation. She is actively involved in international research projects on a broad field of stroke neurology; a main focus of her research is the treatment and prevention of stroke in women.

The Swiss Neurology Webinars are interactive web-based lectures that take place six times a year. They allow participation from wherever you are, as long as you have access to the internet by computer, tablet or even smartphone. Thus, all neurologists in Switzerland, both in clinics and private practice, can attend the lectures of outstanding world experts in real time, allowing us to connect – the community is growing with each session.

Detailed information on how to participate are found on the next page. We are looking forward to your attendance at this live webinar!

Sincerely yours

Prof. Dr. med. Krassen Nedeltchev

Dr. med. Silke Biethahn

Swiss Neurology Webinars

September 17th 2014
17.00–18.00 h

Stroke in women
Speaker: Valeria Caso
