

-SAVE THE DATE-

The School of Pharmaceutical Sciences and Unitec, present:

“AbbVie – Core interests & collaboration opportunities”

AbbVie is a leading research-driven global biotech company that develops innovative therapies. It is interested in exploring collaboration opportunities with UNIGE and HUG to access external innovation and to identify breakthrough technologies and novel therapeutic modalities developed in our institutions.

Join us at this event with **Dr. Joachim Vogt** and **Dr. Guillaume Delorme** from AbbVie to hear their thoughts on potential areas for collaboration, how to create successful partnerships, how to connect and engage with them, what they look for... and much more.
