22<sup>nd</sup> February  
2022**

12:15 - 13:15

Campus Biotech  
Room H8.01.D  
9, chemin des Mines  
Geneva

“Researching the role of emotions and affects in the highly mobile, interconnected and mediatized worlds of the twenty-first century”

**Prof. Birgitt Röttger-Rössler**

(Freie Universität Berlin & Research Center “Affective Societies”)

In my presentation I will first give a brief insight into the work and structure of the interdisciplinary Collaborative Research Center (CRC) „Affective Societies“ at Freie Universität Berlin, and then explain a key concept of the theoretical framework of the CRC in more detail using the example of my own socio-anthropological research on the formation of feeling (Gefühlsbildung) in transcultural social contexts.
