

GCIR - Geneva Centre for Inflammation Research

AUTOINFLAMMATORY DISEASES

Friday 06 March 2026

Reverdin Auditorium CMU

12h30 - 14h30

Pr Dirk Föll, University Hospital Münster, Germany

S100 proteins - Neutrophil activation markers in Still's disease

Pr Marianne Boes, University Medical Center Utrecht, Netherlands

How IL-18 drives an IFN-gamma-driven immune response in Mevalonate Kinase Deficiency

Pr Cem Gabay, GCIR, UNIGE Faculty of Medicine

Heme oxygenase-1 is a biomarker of Still's disease and macrophage activation syndrome (MAS) and is regulated via the IL-18/Interferon-gamma axis

Dr Andy Dernstedt, (Short talk) Department of Pathology and Immunology, UNIGE Faculty of Medicine

Immune cell dysregulation in periodic fever with aphthous stomatitis, pharyngitis, adenitis (PFAPA)

Hosts: Drs Géraldine Blanchard-Rohner and Charlotte Girard, HUG
