WELCOME LETTERS

Dear Colleagues,

Welcome to Switzerland, to Geneva and to the ISODP 2017 Congress. The Geneva University Hospital (HUG) and Swisstransplant, the Swiss National Foundation for Organ Donation and Transplantation, are happy to host you in Geneva for the 14th Congress of the International Society of Organ Donation and Procurement. We established the scientific and educational programs to present the issues, ideas and innovations in organ donation and procurement in meaningful and accessible ways, to stimulate debate and discussion as well as to hear the best ideas from across Europe and the world. We are proud to have the beautiful city of Geneva, home of the World Health Organization, and especially pleased to have the 'Centre International de Conférences' as the venue and the countryside of Switzerland as the backdrop. We hope that you take the time to discover the unique attractions offered.

We are sure you will enjoy participating in the programs and attractions in the middle of Europe - Geneva, Switzerland.

With our best wishes,

Philippe Morel

Congress Chairman

Franz Immer and Martí Manyalich Vidal

Congress Co-Chairs

Dear Friends and Colleagues,

On behalf of the ISODP Council, the LOC, Swisstransplant, TTS, WHO, and all the team led by Philippe Morel, I would like to extend my warmest welcome to the 14th ISODP Congress.

This Congress takes place in the heart of Europe, where donation and transplantation have been developed for many years. We hope that you will be fully engaged and motivated by this experience and that you will acquire useful and inspiring knowledge and skills to implement back home.

The Congress's purpose is to gather countries with developed and emerging donation programs, and create the opportunity to debate and discuss through the scientific program, excellent lectures, panels, and networking. And at the end to return home full of ideas, enthusiasm and motivation; to continue working towards our shared objective: to increase organ and tissue donation, and to facilitate transplantation.

I hope you enjoy this Congress, social program, Geneva, Switzerland, and Europe, and that this will be unforgettable for all.

INFORMATION ABOUT THE SOCIETIES

The mission of the International Society for Organ Donation and Procurement (ISODP) is to foster, promote and develop all aspects of organ and tissue donation and procurement. The ultimate aim is to increase the supply of high quality organs and tissue to match the need.

The mission of the ISODP can be accomplished by focusing on:

- Societal attitudes and legislative requirements
- Perfecting the process of donation and procurement
- Ways of expanding the donor pool
- Measures to minimize donor organ injury
- The development and facilitation of educational programs
- Ethical matters related to organ and tissue donation and procurement

ISODP GENERAL ASSEMBLY

Members of the ISODP are invited to attend the ISODP General Assembly, which will be held on Friday, September 8th from 18:00 to 19:00. During this meeting, the members will receive an update on the Society's activities and the TTS-ISODP Congress Scientific Awards will be presented.

INFORMATION ABOUT THE SOCIETIES

INFORMATION ON THE TRANSPLANTATION SOCIETY

**The
Transplantation
Society**

The Transplantation Society is an international forum for the world-wide advancement of organ transplantation. The Transplantation Society will provide the focus for global leadership in transplantation:

- Development of the science and clinical practice
- Continuing education clinical practice
- Guidance on the ethical practice
- Scientific communication

INFORMATION ON SWISSTRANSPLANT

Swisstransplant is the Swiss National Foundation for Organ Donation and Transplantation. The aim of the foundation is to promote, develop and coordinate the transplantation of organs, tissues and cells nationwide. Swisstransplant is the national office in Switzerland in charge of allocating organs to recipients in accordance with the applicable law. It works at a national level to organize and coordinate all activities related to organ allocation, and also cooperates with similar organizations outside of Switzerland. Swisstransplant is required by its Articles of Association to keep the public informed of all matters pertaining to organ donation and transplantation. Further, it is responsible for maintaining the waiting list of organ recipients, and regularly compiles relevant statistical data on the numbers of organ donors, transplants and waiting times.

INFORMATION ABOUT THE SOCIETIES

INFORMATION ON HÔPITAUX UNIVERSITAIRES GENÈVE (HUG)

Born of a centuries-long tradition of excellence in the sciences and medicine, the Geneva University Hospitals (HUG) were established in 1995. The first university hospitals in Switzerland – they comprise nine hospitals and more than 11,000 staff members – they manage a first-class research programme, closely linked to the Faculty of Medicine of Geneva. Their combined fields of expertise ensure their patients privileged access to the latest in technological developments and medical progress. Their technical support centre, one of the most modern in Europe, includes 39 operating rooms, 2 surgical robots and 5 surgical navigation systems, 51 intensive care beds, 13 rooms for angiographies, endoscopies and catheterisations, 43 medical imaging machines (PET-MRI, PET-CT, SPECT-CT, MRI, cyclotron) and 5 radiotherapy devices. Each year, the HUG devote more than CHF 20 million to the updating of their equipment. The hospitals' private sector, which was fully renovated at the end of 2011, combines expertise and comfort.

Situated in the heart of Europe, Geneva, known as the world's smallest metropolis, is also considered as the world capital of health. The World Health Organization (WHO) has its headquarters in Geneva, as do dozens of other international and non-governmental organizations, along with many large multinational industrial groups which are active in the health sector. This unique combination of financial capital, an ultra-qualified workforce and first-class research makes Geneva a worldwide magnet for biotechnology, the life sciences and cutting-edge medicine. With an international airport at its disposal, it offers city life on a very human scale. Nestled between Lake Geneva and the mountains, Geneva guarantees you a pleasant stay.

KEYNOTE SPEAKERS

ALVIN E. ROTH **THE ONGOING DESIGN OF KIDNEY** **PAIRED DONATION**

KEYNOTE 1

This keynote presentation will be held on Thursday, September 7 from 13:30 to 14:30 in Room 2.

Dr. Alvin E. Roth is the Craig and Susan McCaw professor of economics at Stanford University and the Gund professor of economics and business administration emeritus at Harvard University and the 2017 President of the American Economics Association.

Dr. Roth has made significant contributions to the fields of game theory, market design and experimental economics, and is known for his emphasis on applying economic theory to solutions for "real-world" problems. In 2012, he won the Nobel Memorial Prize in Economic Sciences jointly with Lloyd Shapley "for the theory of stable allocations and the practice of market design".

He graduated from Columbia University's School of Engineering and Applied Science in 1971 with a bachelor's degree in Operations Research. He then moved to Stanford University, receiving both his Master's and PhD also in Operations Research there in 1973 and 1974 respectively.

After leaving Stanford, Roth went on to teach at the University of Illinois which he left in 1982 to become the Andrew W. Mellon professor of economics at the University of Pittsburgh. In 1998, Roth left to join the faculty at Harvard where he remained until deciding to return to Stanford in 2012. In 2013 he became a full member of the Stanford faculty and took emeritus status at Harvard.

Dr. Roth is an Alfred P. Sloan fellow, a Guggenheim fellow, and a fellow of the American Academy of Arts and Sciences. In 2013, Roth, Shapley, and David Gale won a Golden Goose Award for their work on market design. A collection of Roth's papers is housed at the Rubenstein Library at Duke University.

KEYNOTE SPEAKERS

SAM D. SHEMIE **HARMONIZING PRACTICES IN THE** **DETERMINATION OF DEATH** **GLOBALLY**

KEYNOTE 2

This keynote presentation will be held on Friday,
September 8 from 13:30 to 14:30 in Room 2.

Dr. Shemie's area of interest is organ replacement during critical illness. He is a pediatric critical care physician, ECMO specialist and trauma team leader at the Montreal Children's Hospital, McGill University Health Centre. He is a Professor of Pediatrics at the Montreal Children's Hospital, McGill University and honorary staff in the Department of Critical Care Medicine, Hospital for Sick Children, University of Toronto. He is medical advisor, deceased organ donation, with Canadian Blood Services. His academic focus is advancing the science and practice of deceased organ donation. His research interests include the clinical and policy impact of organ failure support technologies, the development and implementation of national ICU-based leading practices in organ donation and research at the intersection of end-of-life care, death determination and deceased donation.

Date: Wednesday, September 6, 2017

Time: 19:00-20:00

Venue: CICG Center, Exhibit Area

All registrants are welcome. Light food and drink will be served.

CONGRESS DINNER

Date: Friday, September 8, 2017

Time: 19:30 -23:00

Venue: Bâtiment des Forces Motrices (BFM), Place des Volontaires 2, 1204 Geneva

Cost: **\$150 USD – Limited onsite purchase is available until Thursday, September 7, at 09:00.**

The Bâtiment des Forces Motrices (BFM), French for "Power plant building", was the power house of a former hydro power plant and waterworks in Geneva called Usine des Forces Motrices. It was created between 1883 and 1892 to exploit the flow of the river to provide water pressure to feed the city's water supply and a hydraulic power network. The structure lost its original function as a power source in 1963, but it nevertheless continued to house pumping equipment to service Geneva's drinking water supply until 1988. Towards the end of the twentieth century the BFM was converted into an entertainment venue, reopening in 1997 as an opera house/concert hall designed by the architect Bernard Picenni in association with the acoustician Peutz and the scenographer dUCKS scéno.

Organized by:

COMPETITION BACKGROUND

The Dumlupinar University, Faculty of Fine Arts, Departments of Visual Communication Design which has hosted many artistic activities of Turkey in national and international areas realized the 1st International Organ Donation Poster Competition in 2015 with the Turkish Transplant Foundation. Successful designers and artists from all over the world have shown the importance of organ donation with the artistic works they have prepared. The competition has been the first in the world with this theme. A catalogue of the work which was created after the competition, has been distributed to thousands of foreign participants in scientific events organized within the scope of the International Transplant Network (ITN) Project coordinated by the Turkish Transplant Foundation. The feedback from the competition has shown that similar projects should be continued in order to "increase public awareness on organ donation since it is a global issue".

The 2nd International Organ Donation Poster Competition is a continuation of the project started with the Turkish Transplant Foundation.

The competition aims to raise public awareness of organ donation at the international level and to provide the opportunity for more patients to return to life after transplantation.

The exhibition will consist of the first 100 poster designs, which will be evaluated by a jury according to the competition rules and purpose.

The poster designs will be displayed for all to view on Level 1 of CIGG. The Awards Ceremony will be held on September 7 from 12:30 to 13:00 followed by a reception on Level 1.
