

FEEDING THE MICROBIOTA

4th Symposium GE-VD

Thursday, February 7th 2019, 13:00-17:00

Geneva University Hospitals (HUG), Geneva

Nutrition and microbiota

Context

Recent studies suggest that the gut microbiota plays a key role in the tolerance to and efficacy of some anti-cancer treatments.

It is therefore tempting to hypothesize that nutrition could modulate the gut microbiota, subsequently influence the immune system and finally impact on the prognosis of cancer patients.

A better understanding of the association between nutrition and gut microbiota could open up new therapeutic options for chronic diseases, as cancer.

Aims

To create a group of physicians/scientists/health professional/industrial interested by the nutritional modulation of microbiota and its impact on energy metabolism.

Public

Professionals (physicians, scientists, dieticians, nurses, pharmacists...).

Language

All presentations will be in English.

Organisers

L. Genton, J. Schrenzel

Scientific committee

L. Genton, G. Greub, F. Pralong, J. Schrenzel

Program

February 7th 2019

13:00 Welcome

Prof. Laurence Genton, Geneva, Switzerland

13:10 Integration of gut microbiota to clinical specialties

Prof. Claude Pichard, Geneva, Switzerland

Moderators: Prof. Claude Pichard, Geneva, Switzerland and Dr. Valérie Dutoit, Geneva, Switzerland

13:15 Gut microbiota modulation through pre- and probiotics

Prof. Laure Bindels, Louvain, Belgium

13:50 Gut microbiota and its role in cancer treatment

Prof. François Giringhelli, Dijon, France

Moderators: Prof. François Pralong, La Tour and Prof. Laurence Genton, Geneva, Switzerland

14:25 Medical aspect of fecal transplantation

Dr. Tatiana Galperin, Lausanne, Switzerland

14:40 Patient's experience of fecal transplantation

Mrs Lasserre Rouiller, Lausanne, Switzerland

14:45 Technical aspects of gut microbiota analysis

Prof. Jacques Schrenzel, Geneva, Switzerland

15:10 Pause

Moderators: Dr. Thibaud Koessler, Geneva, Switzerland and Prof. Gilbert Greub, Lausanne, Switzerland

15:45 Immunology of gut barrier in colo-rectal cancer

Prof. Alexander Moschen, Innsbruck, Austria

16:20 Gut microbiota in hepatic cancer

Prof. Christian Toso, Geneva, Switzerland

16:55 Conclusion

Prof. Jacques Schrenzel, Geneva, Switzerland

17:00 Aperitif

Practical informations

Venue

Auditoire Marcel Jenny – Geneva University Hospitals (HUG)
Principal entry, Floor 0, Rue Gabrielle-Perret-Gentil 4, 1205 Genève

Access

From the train station of Geneva: bus 1 or 5, station “Hôpital”
From the airport or train station of Geneva airport: bus 5, station “Hôpital”

Registration and information

Free Registration on ➔ <http://nutrition-microbiota.org>
For further informations please contact Mrs Carole Cowaloosur
carole.cowaloosurnoirat@hcuge.ch, ☎ 022 372 99 11

Post-gradual credits

Support of the SSNC/GESKES
ASDD/SVDE

Internal medicine, general medicine, gastro-enterology, infectious diseases,
endocrinology, diabetology, oncology (to be requested)
