A Talk by Prof. Gary Siuzdak,
Leading-edge Metabolomics
Scientist with Unique Vision

***“Discovering metabolites
that alter physiology,
an omics perspective”***

Over a week, Gary Siuzdak, a Professor of Chemistry, Molecular and Computational Biology and Director of the Center for Metabolomics at The Scripps Research Institute in La Jolla, California (<http://masspec.scripps.edu/>) will visit four different Swiss research institutions. Gary's research focuses on developing mass spectrometry-based metabolomic technologies including, XCMS (<https://xcmsonline.scripps.edu/>) and METLIN (<http://metlin.scripps.edu/>) informatic tools, artificial intelligence, metabolomics activity screening, nanostructure-based imaging, and their applications to fundamental biochemistry and therapeutic intervention. (Tour organizer: Prof. Nicola Zamboni at ETH)

Wednesday May 29, 11 am

University of Lausanne

Génopode A Auditorium

Génopode building

UNIL Sorge

CH – 1015 Lausanne

Host: Dr. Julijana Ivanisevic, UNIL

Wednesday May 29, 4 pm

UNIGE – University of Geneva

Auditoire Albert Renold CMU

2^{ème} étage bâtiment B

24 rue du Général-Dufour

CH – 1211 Genève

Host: Prof. Serge Rudaz, UNIGE

UNIL | Université de Lausanne
