

Symposium SNF Eccellenza
Vendredi 29 novembre 2019, CMU salle A04.2906

- 09 :00 – 09 :10** **Profs Christian Lüscher et Jean-Louis Frossard**
Accueil des Présidents des Sections de Médecine Fondamentale et Clinique
- 09 :10 – 09 :30** **Yannick Muller** University of California San Francisco
Engineering regulatory T cells to induce tolerance in transplantation (video conference)
Host: Immunology and Allergology Department
- 09 :30 – 09 :50** **Raphael Meier** University of California San Francisco
The anti-inflammatory role of mesenchymal stem cells in metabolic syndrome (video conference)
Host: Surgery Department
- 09 :50 – 10 :10** **Cristina Berchio** University of Geneva
The development of emotionally-driven executive functioning in overweight children: a high density EEG study
Host: Psychiatry Department
- 10 :10 – 10 :30** **Katja Reinhard** Neuro-Electronics Research Flanders (NERF) Leuven
Delineating the mechanisms of adaptation in the visuo-motor system
Host: Basic Neurosciences Department
- 10 :30 – 10 :40** **Pause**
- 10 :40 – 11 :00** **Camille Nemitz Piguet** University of Geneva
Development of neural networks for affective control during adolescence: relevance for the emergence of emotion dysregulation disorders
Host: Psychiatry Department
- 11 :00 – 11 :20** **Rafael Ruiz de Castaneda** University of Geneva
Tackling snakebite envenoming empowered by artificial intelligence and crowdsourcing: a systemic approach from ecology to epidemiology and healthcare
Host: Department of Community Health and Medicine
- 11 :20 – 11 :40** **Paola Benaglio** University of California San Diego
Investigating the non-coding genome in complex diseases
Host: Department of Genetic Medicine and Development
- 11 :40 – 12 :00** **Sana Intidhar Labidi-Galy** Geneva University Hospitals
Impact of menopause on breast cancer initiation and progression in BRCA1 carriers
Host: Department of Oncology
- 12 :00 – 13 :00** **Lunch**
- 13 :00 – 13 :20** **Sibylle Vonesch** EMBL Heidelberg
Mapping genotype-phenotype relationships using multiplexed precision genome engineering
Host: Department of Genetic Medicine and Development
- 13 :20 – 13 :40** **Taro Kitazawa** FMI Basel
Revealing the Logic of Neuronal Identity Specification
Host: Department of Genetic Medicine and Development
- 13 :40 – 14 :00** **Diego Andrey** Geneva University Hospitals
At the crossroad between virulence and resistance in Klebsiella pneumoniae: deciphering the key determinants of successful clinical multidrug-resistant clones
Host: Department of Medicine
- 14 :30** **Discussion des Bureaux SMF et SMC**
CMU salle A03.2807.A
